

## Science Based Target Health Check

1. Has your company completed a GHG inventory that covers both Scope 1 and Scope 2 emissions? If so, has your inventory been verified?
2. Have you evaluated the relevance of all or some of the 14 Scope 3 emissions categories? If yes, which of the following Scope 3 emissions have been identified as relevant to your company:
  - Purchased goods and services
  - Capital goods
  - Fuel-and-energy-related activities (not included in Scope 1 or 2)
  - Upstream transportation and distribution
  - Waste generated in operations
  - Business travel
  - Employee commuting
  - Upstream leased assets
  - Downstream transportation and distribution
  - Processing of sold products
  - Use of sold products
  - End of life treatment of sold products
  - Downstream leased assets
  - Franchises
  - Investments
3. Have you calculated the emissions associated with all or some of your relevant Scope 3 categories?
  - a. What were the results of this analysis?
  - b. Do you currently have methods in place to communicate & engage with your value chain and collect environmental/ energy/ carbon data?
3. Do you purchase any Renewable Energy Credits, Power Purchase Agreements, or Guarantees of Origin?
4. Has your company implemented energy efficiency projects to decrease energy consumption?
  - a. Can you easily share KPIs such as revenue, production volume, square footage, full time employees, etc.? Does your company anticipate significant growth in either market share or in revenue (or other metrics outlining the performance of your company)?
  - b. Do you already have access to the following data points on a 3-5+ year basis?
    - Sales forecast (*year over year growth of anticipated sales*)
    - Production Forecast (*year over year growth of anticipated production growth*)
    - Projected Gross profit
  - c. Is your sales growth expected to remain relatively stable over time or does it fluctuate significantly through market demands, M&A activity, technological innovations, etc.?
  - d. Do you expect significant productivity gains or losses over time through innovation, etc.?
6. Has your company set an emissions/energy reduction target before?
7. Which GICS industry classification best represents your company?
8. Why are you interested in setting a SBT? OR what is your company's primary goal?
